## Supplemental Report of Dr. Kenneth R. Mayer

*Johnson, et al., v. WEC, et al., No. 2021AP1450-OA*  
January 7, 2022

This supplemental report provides plan metrics for the BLOC Assembly and Senate plans that included the corrections necessitated by a small number of stray Census Block assigned to incorrect districts. None of my substantive conclusions change as a result of the corrections. I do not re-report the BVAP percentages for the Black opportunity districts that were listed in my original report because those districts did not change.

### 1. Overall Summary for Corrected BLOC Assembly plan:

Population Deviation:	1.32% (unchanged)
Compactness (Reock)	0.38 (unchanged)
Core Population Retention:	84.3% (84.2% in original report)

The assembly plan has 78 municipal splits (24 cities, 42 towns, and 12 villages), and 53 county splits. These totals are reported in the tables below.

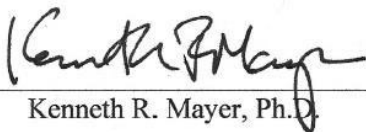

### 2. Overall Summary for Corrected BLOC Senate plan

Population Deviation:	0.96% (unchanged)
Compactness (Reock):	0.41 (unchanged)
Core Population Retention:	89.6% (unchanged)
Delayed Senate Vote	179,677 (48 additional people)

The Senate plan has 53 municipal splits (19 cities, 24 towns, and 10 villages) and 42 county splits. These totals also reported in the tables below.

In addition to plan splits, district by district plan metrics, including population, core retention, and compactness figures are reported below.

I declare under penalty of perjury that the foregoing is true and correct. Executed on January 7, 2022.

  
Kenneth R. Mayer, Ph.D.
